

[SM-LSM-006] change condor queue settings

1. send an email to schedconfig@gmail.com and state what queue and parameters you want to be changed

```
Good morning,  
  
could you please change the settings of the following queues?  
  
ANALY_LONG_BNL_ATLAS (enable lsm-get)  
  
copytoolin = lsm  
envsetupin = source /afs/usatlas.bnl.gov/i386_redhat72/opt/lsm/setup.sh  
  
ANALY_BNL_ATLAS_1 (enable lsm-put)  
  
copytool = lsm  
envsetup = source /afs/usatlas.bnl.gov/i386_redhat72/opt/lsm/setup.sh  
  
warning, the parameters aren't the same on purpose.  
we want lsm-get activated on the LONG queue and lsm-put on the other.  
  
thank you.  
  
cheers,  
Pedro Salgado
```
