

[SM-LSM-005] local site mover validation

- request Yuri Smirnov (or Xin Zhao?) (cc:Grid group leader and Storage group leader) to run a few simulation or reconstruction jobs over the BNL_ITB_ATLAS_TEST queue
- monitor the progress in BNL_ITB_ATLAS_TEST queue Panda monitoring pages
- fix problems until it's working again or rollback **setup.test.sh** to the previous version
[after done testing this queue *must*** still be able to retrieve files so in case of problems with a release a rollback is imperative]**
